City & Guilds 2391-50 Level 3

Initial Verification & Certification of Electrical Installations

The City and Guilds 2391-50 electrical course has been designed to meet the needs of the electrical installation industry, and is aimed at practicing electricians who have not carried out inspection and testing since qualifying or who require some update of training before going on to other City and Guilds qualifications.

Candidates who achieve the 2391-50 qualification could progress on to the City and Guilds 2391-51: the Level 3 Certificate in Inspection, Testing and Certification of Electrical Installations.

The City and Guilds 2391-50 course will focus on the teaching and learning of initial verification and certification of electrical installations.

Periodic testing will not be covered in this qualification.

There are 3 examinations involved -

- One 90 minute online multiple choice test (2391-050)
- One 90 minute practical assignment (2391-500)

To further support this course, we offer a 1 day practical workshop available to candidates who have completed the course and require further 'hands on' practical experience prior to their practical exam. Most students who take this option elect to complete this the day before their practical assessment.

The course costs include examination entry fees, buffet lunch and refreshments throughout the day.

Recommended book list:

BS 7671:2011 IEE 17th Edition Wiring Regulations with amendment 1

Inspection and Testing Guidance Note 3 with amendment 1

Please note; both the above books can be loaned for the duration of the course.

COST : £525 (+ VAT) 4 Day
